| 5519 | Preval Tubes |

Color Picker**REDUCES THE MIXING TIME FOR COLORS
INCREASE PRODUCTIVITY**

Due to the enormous range of colors that exist in Automobiles & Furniture, mixing and matching colors is not always easy.

So we have developed this system.

The Color Picker reads the color of the surface directly and gives the formula code needed to dye the part.

This device accounts for the wear and ageing of the original color, and gives you choices of colors to choose from.

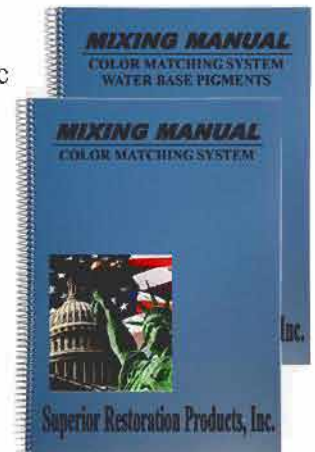

Use any of the formulas in our system to obtain the quantity of dye necessary to mix with each basic color.

Formulas with PDA

You just enter the code obtained from the Color Picker and the amount of dye desired.

**Formula Books**

These books included a complete list of formulas, basic advice for mixing and a practical listing of auto manufacturers. Available for lacquer base dyes, water base (pre-mixed) and water base pigments.

**Features:**

- Various listings
- Easy handling
- Reduces color mixing time
- Reduces unnecessary waste of dyes
- Increase productivity

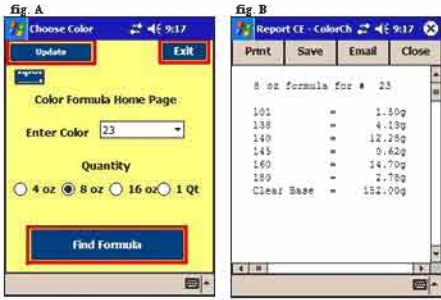

PRECISION DIGITAL SCALES
